

Welding—with a glue gun?

February 1, 2016

Typically, when we think of welding (joining two metals together), we think of protective gear and flying sparks or really hot flames. In his demonstration, Jason Cooley will teach you to weld with a glue gun and a special metal alloy in a way that is fun for the whole family.

Join us every second Saturday of the month for Scientist in the Spotlight, a program featuring scientists that have been certified for public outreach through the Museum's Scientist Ambassador Academy. These scientists will talk with museum visitors for a couple of hours about their favorite science, technology, engineering, or math (STEM) subject. Conversations are intended for all ages and include interactive hands-on activities that make learning easy and fun. [Learn more about the Scientist Ambassador academy.](#)
